Professional Summary

Full-stack software engineer specializing in building production-grade SaaS platforms and commercial web applications using React, Next.js, TypeScript, and cloud-native technologies. Experienced in architecting multi-tenant systems, payment integrations, and scalable backend infrastructure. Proven ability to independently design, build, deploy, and maintain complete software products for both local and international markets.

Technical Skills

Languages: TypeScript, JavaScript, SQL, HTML5, CSS3

Frontend: React, Next.js 14, Tailwind CSS, GSAP, Framer Motion, Three.js (R3F), Responsive Design

Backend & Databases: Node.js, PostgreSQL, Neon, Supabase, Firebase, Drizzle ORM, Prisma

Cloud & DevOps: Vercel, Docker, Linux, GitHub Actions, CI/CD, AWS (Basic), Nginx

Payments & APIs: M-Pesa Daraja API, Paystack, Africa's Talking SMS, REST APIs, GraphQL

Tools: Git, GitHub, VS Code, Figma, Clerk

Featured Projects

Zyntric Systems

Tech Stack: Next.js 14, TypeScript, Neon PostgreSQL, Drizzle ORM, Paystack, M-Pesa, Tailwind CSS, Vercel

- Architected and deployed a dual-market digital template marketplace supporting Kenyan and international customers.
- Implemented an idempotent checkout system preventing duplicate payment processing through unique session constraints.
- Designed a secure digital asset delivery pipeline using single-use UUID download tokens with 24-hour expiry and server-side ZIP streaming.
- 12,900+ downloads across 50+ countries with zero recorded payment failures.

PropFlow Kenya

Tech Stack: Next.js, Clerk, Neon, Drizzle ORM, M-Pesa, Africa's Talking

- Architected an invite-only property management SaaS for Kenyan real estate agencies.

- Built multi-tenant data isolation across all agency records.
- Integrated M-Pesa STK Push and Paybill validation webhooks.
- Automated monthly billing and SMS statements for tenants.

DevSchool SMS

Tech Stack: Next.js, React, Tailwind CSS, PostgreSQL

- Developed a multi-role school management platform for administrators, teachers, parents, and students.
- Built attendance tracking, grade management, fee records, and real-time parent notifications.
- Digitized complete academic and administrative workflows.

AI Medical Assistant

Tech Stack: Next.js, Firebase, Clerk, shadcn/ui

- Created a SaaS platform for AI-powered medical report analysis.
- Implemented secure patient data handling and intelligent health insights generation.

Experience

Freelance Full-Stack Developer | Self-Employed | 2023 - Present

- Build and deploy full-stack web applications for clients and personal products.
- Design scalable SaaS architectures and payment workflows.
- Develop production-ready frontend and backend systems.
- Manage deployment, CI/CD pipelines, and cloud infrastructure.
- Deliver end-to-end software solutions independently.

Professional Development

Self-Taught Full-Stack Software Engineering (2022 - Present)

- Modern Web Development
- System Design
- SaaS Architecture
- Payment Systems
- Cloud Deployment
- Database Design
- Performance Optimization
- Software Engineering Best Practices

Achievements

- 12,900+ template downloads across commercial projects.

- Products used in over 50 countries.
- Production systems handling real financial transactions via M-Pesa and Paystack.
- Built and deployed multiple end-to-end SaaS applications independently.

Languages

English - Professional Working Proficiency

Swahili - Native Proficiency

Core Competencies

- Full-Stack Development
- SaaS Architecture
- Payment Systems Integration
- Multi-Tenant Applications
- Cloud Deployment
- System Design
- Database Architecture
- Product Engineering
